

## Forklift Operator

### Course Overview

This is a highly practical three day course, emphasizing on operator skills and HSE. Suitable for all novice drivers or for drivers with little or no experience. Assessments are based on UK standard (RTITB).

Operating a forklift is a specialized skill. Many accidents are caused by untrained drivers unaware of the forklift's capabilities and limitations. Participants having completed the course will have the knowledge and technical skills to operate a forklift in a safe and competent manner.

### Theoretical Training

- Operators safety code
- Daily inspections
- Principles of safe operation
- Hydraulic systems
- Operating practices
- Video on safe fork lift operation
- Feedback
