

Exhibit 01.04.08 AWS SENSE Policy Statement

UT establishes the minimum requirements for qualification and certification as a SENSE Level 1 Entry Welder with the American Welding Society. UT commits to act as SENSE Training Organization using or guided by AWS QC10/EG2.0 or QC12/EG4.0 Standard and Recommended Guidelines.

Applying this Standard, UT shall specify practical knowledge and performance test that require a minimum level of reading, computational, and manual skills to successfully complete. During training sessions and marketing activities, our clients will be informed about the AWS SENSE Entry Welder Training Programme.

The core of our company's internal organization is based on the AWS SENSE Level 1 – Entry Welder as laid down in our Management System Manuals. This Management System will be frequently audited, and the audit findings, as well as other topics related to the promotion and implementation of the AWS SENSE Level 1 – Entry Welder, will be discussed in the regularly scheduled Management Review Meetings.

If you have any questions, queries or comments with regard to AWS SENSE Level 1 – Entry Welder training standards or courses, please visit the <http://www.aws.org/w/sense>.
